**ANTÓNIO GUTERRES**

The UN Secretary-General

Messages to WIOTC Annual Conferences

“

I am pleased to send my greetings to the World Internet of Things Convention.

Real-time data sharing, IoT applications, information networking and artificial intelligence are enabling the development of smart grids, smart homes and smart cities. Across various sectors, including transportation, agriculture, energy, and healthcare, these technologies are improving quality of life, promoting sustainability, and fostering more responsive services.

Digital technology has transformed every aspect of our lives.

Unleashing the potential of a new digital economy depends on a fully connected world.

Let's ensure that these rapidly evolving technologies serve all people, equally.

I wish you a productive convention. Together, let us harness innovation to shape a better tomorrow.

”

**Amandeep Singh Gill**

Under-Secretary-General and  
Special Envoy for Digital and  
Emerging Technologies of  
United Nations

“ We gather on the 10th anniversary of the World Internet of Things Convention. I want to express my appreciation to the Convention for providing a platform for dialogue on emerging technologies and their applications.

The Global Digital Compact provides a global blueprint for navigating digital transformation. Digital technologies are reshaping our economies as profoundly as our daily lives. They also hold great promise for accelerating progress toward the Sustainable Development Goals.

Today’s event reflects the vision of the Global Digital Compact. At the heart of the GDC lies the digital economy.

As we open this 10th World Internet of Things Convention and the inaugural Conference on Sustainable Development, let us renew our shared commitment to inclusive digital innovation and forward-looking cooperation across sectors and borders.

Working together is the key to ensuring that access to digital opportunities is both universal and meaningful.

I hope your discussions and insights will make valuable contributions to the global dialogue on digital and emerging technologies.

”

# About WIOTC

The World Internet of Things Convention, or WIOTC, is an IoT-digital-economy international convention organization that is innovative and nonprofit with global impact and has emerged as one of the most influential and authoritative institution focusing on the internet of things and digital economy in the world. The name of the organization is also the name of our leading annual convention with high-end and cutting-edge brand —— WIOTC as an important international event.

ANNUAL  
CONFERENCE | **2026**

# WIOTC

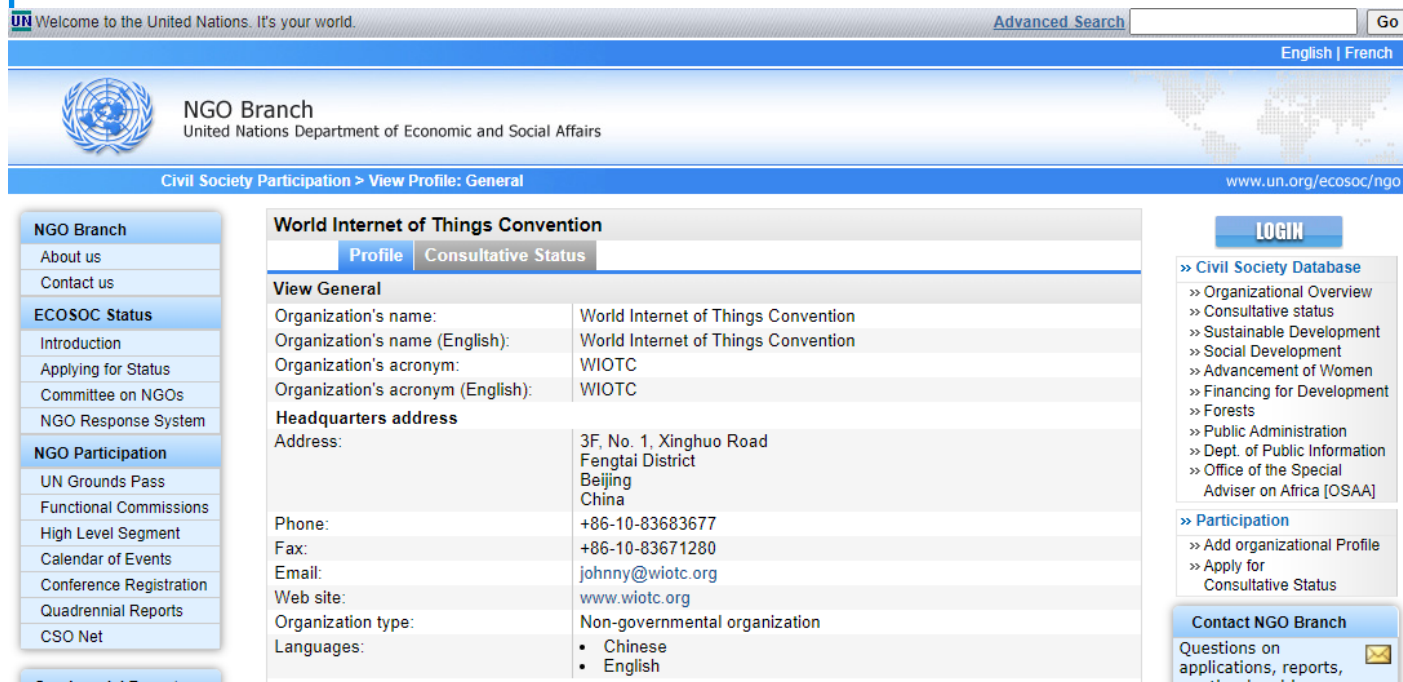

## World Internet of Things Convention

- An IoT digital economy international convention organization that is innovative and non-profit
- A non-governmental organization registering its entity information in the United Nations Economic and Social Council
- A high-end and cutting-edge annual convention of digital economy

### OUR MISSION

## BUILD A SMART WORLD WHERE ALL THINGS ARE INTERCONNECTED

**OUR GOALS AND TASKS:** Promote the IoT construction and drive the innovative development of world economy and society under UN framework; Contribute to the SDGs of United Nations; Formulate IoT international convention and general standards; Support the building of IoT new economic market; Bridge the digital divide; Benefit the world people in terms of smart life and work.

The screenshot shows the profile page for the World Internet of Things Convention on the United Nations website. The page is titled "World Internet of Things Convention" and is part of the "NGO Branch" under the "United Nations Department of Economic and Social Affairs". It includes a navigation menu on the left with options like "About us", "Contact us", "ECOSOC Status", "Introduction", "Applying for Status", "Committee on NGOs", "NGO Response System", "NGO Participation", "UN Grounds Pass", "Functional Commissions", "High Level Segment", "Calendar of Events", "Conference Registration", "Quadrennial Reports", and "CSO Net". The main content area displays the organization's name in both English and Chinese, its acronym (WIOTC), and its headquarters address in Beijing, China. It also lists contact information including phone, fax, email, and website. A "Languages" section indicates that the organization's content is available in Chinese and English. On the right side, there are sections for "LOGIN", "Civil Society Database", "Participation", and "Contact NGO Branch".

构建万物互联的智慧世界

BUILD A SMART WORLD WHERE ALL THINGS ARE INTERCONNECTED

WIOTC has successfully organized 10 international annual conferences with global scale – World Internet of Things Convention (2016 WIOTC · Beijing Summit, 2017 WIOTC · China Summit, WIOTC 2018, WIOTC 2019, WIOTC 2020, WIOTC 2021, WIOTC 2022, WIOTC 2023, WIOTC 2024, WIOTC 2025 and Conference on Sustainable Development of Global Intelligently Interconnected Digital Economy) and 300 plus international forums and summit sessions. Every annual conference boasts tens of millions of guests and viewers on the site and online. The UN Secretary-General António Guterres delivered speeches for WIOTC Annual Convention several times and his speech was published at the UN Official Website.

**1** Compiling and publishing the world's first "World Internet of Things White Paper", "Beijing Declaration on the World IoT" and "White Paper on the Intelligently Interconnected Digital Economy", and launching the Initiative "Build the Intelligently Interconnected Global Market of Digital Economy".

**2** Creating a new concept that "Internet of Things" is another great change and revolution -- 'wisdom revolution' after the agricultural revolution, industrial revolution and information revolution, which represents the human society".

**3** Originating the new cognition and definition: "The internet of things is a network of smart world as a carrier of new globalized economy integrating the new generation of information technology, digital economy and real economy."

**4** Originating and inventing the model of advanced digital economy, the solution of building the intelligently interconnected global market of digital economy and the architecture and system of the intelligently interconnected advanced digital economy.

**5** Establishing the "World Internet of Things Ranking List Top 500"

**6** Setting the intelligently interconnected digital economy examples (global demonstration cities and enterprises)

Leaders from the United Nations and UN agencies including UNESCO, ITU, and UNCTAD, international organizations such as ISO, IEC, and IEEE, regional intergovernmental organizations like the European Union and ASEAN as well as representatives from nearly one hundred countries joined WIOTC events in a way of speech or congratulatory letter.

WIOTC has established the **top-level architecture system of the World IoT**, innovated the **definition of IoT**, proposed the concept and cognition that **IoT represents the “Wisdom Revolution”**. The organization has also created the **world IoT Ranking List (Top500)**, **World IoT Awards**, and **IoT World Fair**. It has released the **Declaration of the Global Intelligently Interconnected Advanced Digital Economy and Social Development**, **White Paper on the Intelligently Interconnected Digital Economy**, the **Initiative “Build the Intelligently Interconnected Global Market of Digital Economy”**, **World IoT White Paper** and **Beijing Declaration on World IoT**.

**Covering 17 fields** including industry, agriculture, energy, logistics, smart city, artificial intelligence, health care, ecological environmental protection, security safety, transportation auto intelligence, military technology, chemical industry, culture and education, tourism, public affairs, aerospace and finance.

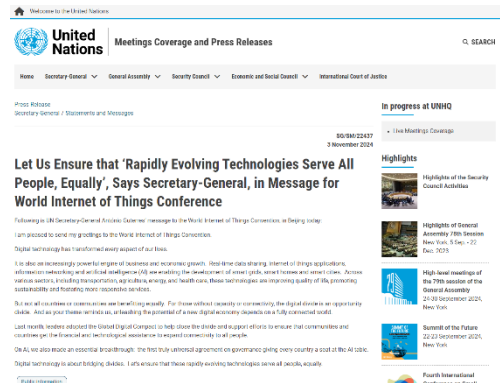

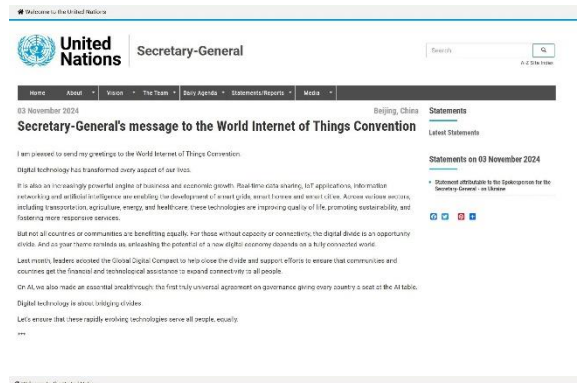

WIOTC has forged friendly relations with ITU, UNESCO, UNCTAD, UNIDO, UNDP, ISO, IEEE, CENELEC, WFEO as well as agencies and diplomatic envoys from **more than 100 countries** and pooled over **30 international IoT organizations**, standards organizations and **thousands of IoT enterprises**.

We have successfully organized and convened **10 annual conferences** (2016-2025 WIOTC), **First Conference on Sustainable Development of Global Intelligently Interconnected Digital Economy** and nearly **300 international forums and summit sessions**.

**Our events have been reported and reproduced by more than 1,000 media around the world**, including CGTN, CCTV, Xinhua News Agency, China News Service, BRICS TV, Phoenix TV, PR Newswire, Bloomberg, AFP, News Corporation, etc.; mainstream media such as the CPC official journal, Chinese ministerial-level newspapers and magazines and industry media reported and our events and forwarded news about us; think tanks of various countries collected WIOTC reports. Our media exposure amounts to 5 billion.

## The UN Secretary-General António Guterres delivered speeches via video and written formats several times for the WIOTC Annual Convention Which can be searched and read at the United Nations official website.

The United Nations official website, official website of the State Council of China, Office of the Central Cyberspace Affairs Commission, CPC News, etc. also covered and released the news about WIOTC events.

The annual conference every year has attracted the attention of global media as hundreds of mainstream media sources including PR Newswire, Xinhua News Agency, Europe Press, Forbes magazine, CPC News, CGTN, CRI, Nouvelles D'Europe, People's Daily, CNR News, Yahoo Finance, China Daily, Sinoustimmes, CPPCC, Phenix TV, China's Foreign Trade, and so on covered the event.

## China's digital economy lead set to drive world growth

Emerging technologies such as the internet of things and the booming digital economy, where China is leading, will create new growth drivers for the world amid a challenging global environment, experts and entrepreneurs have said.

Despite headwinds from geopolitical issues and the COVID-19 pandemic, the blossoming of cutting-edge technologies, such as IoT and innovations in the digital economy, will inject new impetus to the world economy, said He Xiangming, chairman of the World Internet of Things Convention executive committee.

The total number of 5G base stations in China will likely top 3 million this year, laying a solid foundation for the development of IoT, and the GDP of the emerging digital economy will likely expand by around 20 percent. He said during a recent meeting in Beijing ahead of the World IoT Top 500 Summit.

"The world is currently transitioning from an industrial to a digital economy, with the latter accounting for around half of global GDP and growing at around 10 percent annually," said He Xiangming, vice-chairman of the World Internet of Things Convention executive committee. "This year, the growth rate may hit over 25 percent," he said.

He Xiangming said IoT-supported digital and smart industries have huge growth potential, and a rising number of IoT products, systems, and platforms have already cropped up, covering a wide range of fields including industry, agriculture, logistics, transportation, energy and smart lives.

Despite headwinds from geopolitical issues and the COVID-19 pandemic, the blossoming of cutting-edge technologies, such as IoT and innovations in the digital economy, will inject new impetus to the world economy, said He Xiangming, chairman of the World Internet of Things Convention executive committee.

The total number of 5G base stations in China will likely top 3 million this year, laying a solid foundation for the development of IoT, and the GDP of the emerging digital economy will likely expand by around 20 percent. He said during a recent meeting in Beijing ahead of the World IoT Top 500 Summit.

"The world is currently transitioning from an industrial to a digital economy, with the latter accounting for around half of global GDP and growing at around 10 percent annually," said He Xiangming, vice-chairman of the World Internet of Things Convention executive committee. "This year, the growth rate may hit over 25 percent," he said.

He Xiangming said IoT-supported digital and smart industries have huge growth potential, and a rising number of IoT products, systems, and platforms have already cropped up, covering a wide range of fields including industry, agriculture, logistics, transportation, energy and smart lives.

During the past few years, China has made considerable progress in boosting the growth of the digital economy.

The world's digital economy reached 16.5 trillion yuan (2.3 trillion US dollars) in 2022, around the world and accounting for 28.8 percent of the country's GDP, according to a white paper released by the China Academy of Information and Communications Technology.

2019 World Internet of Things Convention Successfully Held in Beijing

WIOTC publie son classement mondial de l'IoT Top 500 2023

PR Newswire

PEKIN, 14 juillet 2023 (PRNewswire) – Le sommet mondial World IoT Top 500 Summit 2023, préfixe à la Convention mondiale sur l'Internet des Objets (WIOTC) 2023, s'est tenu à Pékin, en Chine, du 11 au 14 juillet 2023. Des représentants gouvernementaux, des universitaires et des conseillers de plus de 20 pays, dont la Chine, la France, la Suisse, le Brésil, le Japon et d'autres pays, ont participé à la conférence internationale sur l'Internet des Objets (WIOTC) et au Conseil d'administration, ont participé à la cérémonie. Le classement mondial de l'IoT 2023, le 2023 World IoT Ranking List Top 500 (WIOTC Top 500), a été officiellement annoncé à Pékin.

2019 World Internet of Things Convention Successfully Held in Beijing

The World IoT Summit (World IoT Top 500 Summit) was held in Beijing, China, from July 11-14, 2023. The summit was organized by the World Internet of Things Convention (WIOTC) and the China Academy of Information and Communications Technology (CAICT).

The summit featured a high-level dialogue on the development of the digital economy and the Internet of Things (IoT) industry. Participants included government officials, industry experts, and researchers from various countries.

The summit also featured the announcement of the 2023 World IoT Top 500 Ranking List, which ranked the top 500 IoT companies globally. The list was based on various criteria, including revenue, innovation, and market penetration.

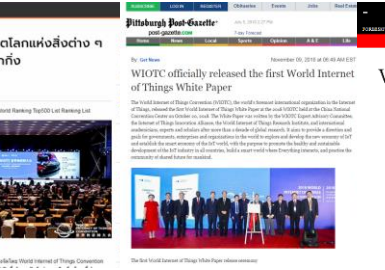

China urges fresh standards for the internet of things

China has called for a global effort to jointly set up a demonstration platform for the internet of things and promote the healthy development of the global IoT industry, according to a statement released in Beijing on Thursday.

Issued by the World Internet of Things Convention Organizing Committee and other allies, the declaration advocates a global effort to build universal IoT standards and establish a world IoT fund to support the global development of IoT industry.

Wang, executive chairman of the committee, said the information revolution has already changed people's daily lives, while the IoT, which is more comprehensive and much larger, will thoroughly change people's lives and production modes.

"The fourth revolution will be the intelligent revolution. The IoT is most applied and developed in China. As a global leader in the development of the IoT, China will work with other nations to set the game rules, leading IoT innovation and development."

WIOTC officially released the first World Internet of Things White Paper

The World Internet of Things Convention (WIOTC), the world's foremost international organization in the Internet of Things, released the first World Internet of Things White Paper at the 2023 WIOTC Summit held in the China National Convention Center on October 20, 2023. The White Paper was written by the WIOTC Expert Advisory Committee, the Internet of Things Innovation Alliance, the World Internet of Things Research Institute, and international academicians, experts and scholars who have done a decade of global research. It aims to provide a direction and goals for governments, enterprises and organizations in the world to explore and drive the economic of IoT and establish the main scenarios of the IoT world, with the purpose to promote the healthy and sustainable development of the IoT industry in all countries, build a smart world where everything interacts, and practice the community of shared future for mankind.

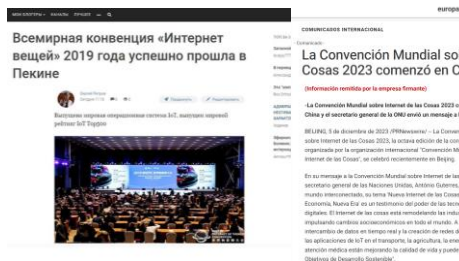

WIOTC publica 2023 World IoT Ranking List Top 500

Beijing, 13 de julho de 2023 (PRNewswire) – A World IoT Top 500 Summit 2023, conhecida como a "World IoT Top 500 Summit 2023 (WIOTC) 2023", foi realizada em Pequim, na China, de 11 a 14 de julho de 2023. O evento foi organizado pela World Internet of Things Convention (WIOTC) e pela Academia Chinesa de Informação e Comunicação (CAICT).

O evento destacou um diálogo de alto nível sobre o desenvolvimento da economia digital e da indústria de Internet das Coisas (IoT). Os participantes incluíam funcionários governamentais, especialistas da indústria e pesquisadores de vários países.

O evento também destacou o anúncio da lista de ranking mundial de IoT 2023, a lista de ranking mundial de IoT Top 500 (WIOTC Top 500), que foi oficialmente anunciada em Pequim.

ANNUAL CONFERENCE | 2026

## Conference on Sustainable Development of Global Intelligently Interconnected Digital Economy & World Internet of Things Convention

1

### Time & Location

November 2026, Beijing, China, Toulouse, France

2

### Theme

A World of Smart Interconnection, A Future of Win-Win Cooperation

3

### Scale

3,000 participants

4

### Host

World Internet of Things Convention

5

### Co-host

China Mobile Communications Association, etc.

6

### Co-organizer

World Broadband Association, World Green Design Organization,  
World IoT Research Institute, IoT Innovation Alliance, etc.

## Opening Ceremony

UN Secretary-General, government officials from relevant countries, heads of international organizations deliver speeches

## Ambassador Forum (State Promotion)

Keynote Speech/ Roundtable Dialogue by Ambassadors of various countries in China.

## Urban Innovative Development Forum

Showcase the experiences of cities in restructuring and upgrading, innovative development and urban image; discuss the advanced digital economy and future development

Invite heads of international organizations, academicians, experts to discuss related topics

## Key Releases

Blue Paper on the Development of Global Digital Economy  
Release of industrial reports

## World New Economic Forum

Applications and Cases Presentation (Global Digital And High-tech Enterprises).

Entrepreneur's Roundtable Dialogue (International Organization/ Research Institute/ Chambers of Commerce/ Company).

## World IoT Top 500 Summit

Release Ceremonies of the World IoT Top 500 List.  
Thematic Speeches by World IoT Top 500 Enterprises.

## International Cooperation Forum

Inviting government agencies, international organizations, enterprises and local government to discuss international cooperation

### Parallel Forum

Parallel Forum on Industry, Agriculture, Energy, AI, Logistics, Vehicles, Transportation, Smart Life, Smart City, Healthcare, Finance, etc.  
Thematic Forum on Standardization, AI+IoT, Low-Altitude Intelligent Connected and others.

### Special Forum for Enterprises

Release of latest products, technology and solutions.

## THEMATIC EVENTS

### Supply Chain Matchmaking Meeting

Set up a special area for connecting supply and demand to help enterprises expand their upstream and downstream supply chains/industrial chains.

### Government Investment Session

Sharing of investment climate, policy and projects by local government/ high-tech zone/ industrial park.

## Intelligently Interconnected Digital Economy Global Demonstration Prize

Issue the 2026 Global Demonstration  
Cities and Enterprises

## World IoT Top 500 Ranking List

Release the 2026 World IoT  
Ranking List Top 500  
(Gold List Top 100, Silver List Top  
100, Industry List Top 100, Bronze  
List Top 100, Potential List Top 100)

## World IoT Awards

Release World IoT Awards  
CATEGORY – PERSON: “ Special  
Contribution Award”, “ Promotion  
Award”, “Person of the Year  
Award”  
CATEGORY – ENTERPRISE:  
“ Leading Enterprise of The Year  
Award”, “Outstanding Enterprise  
of The Year Award” , “Excellent  
Enterprise of The Year Award”  
CATEGORY – PROJECT:  
“Innovation Project Award”

## Excellent Cases in the Fully and Intelligently Connected Digital Economy

Issue the Excellent Cases  
Will be selected from the following  
industries: IIOT, AI, Smart Life,  
Smart City, Digital Agriculture,  
Digital Energy, Digital Security,  
Health Care, Smart Logistics and  
other industries

## World New Economic Forum

Having been organized for 4 years in a row, the forum will invite government leaders, academicians, experts, scholars, corporate executives to share their views on the topics related IoT digital economy. As a new brand event of IoT digital new economy, the event is committed to increasing people's knowledge and cognition of digital economy supported by IoT and helping to boost the rapid development of IoT digital economy, thus creating new points of economic growth.

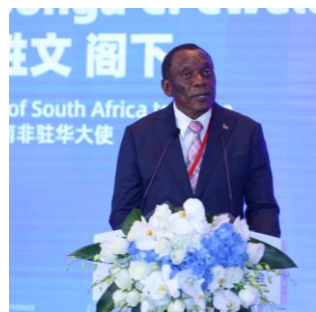

## Ambassador Forum

The **Ambassador Forum**, as an important brand of annual conference, was initiated in 2021. The high-end forum is held in the form of roundtable dialogue and keynote speech. Ambassadors from various countries will be invited to share their views on the situation of IoT development in their countries, the direction of IoT development and construction and areas of potential cooperation.

## World IoT Top 500 Summit

As one of annual special events of World Internet of Things Convention (WIOTC), World IoT Top 500 Summit has attracted the attention of international community, international organizations, embassies in China, and mainstream media as well as top 500 enterprises including Huawei, Baidu, Tencent, Haier, Bosch, Intel, PTC, IBM and tens of thousands of IoT-related companies through extensive participation and strong support.

The summit consists of sessions such as Keynote Speech by Top 500 Enterprise, High-end Roundtable Dialogue, Multilateral International Cooperation Forum, and release and awarding ceremonies of World IoT Ranking List Top 500, aiming at promoting the development of IoT and digital economy and helping to strengthen the cooperation between IoT enterprises and governments.

## Special Enterprise Session

The session is targeted at IoT digital and high-tech companies. Here they can speak, share views on or release their products, technologies, solutions. At the same time, academicians and experts will join the session to share their report; companies can introduce the situation of frontier technologies. The session can be hosted or co-organized by companies.

*Duration: one to four hours*

*Scale: 200 to 500 participants*

## Industrial/Thematic Forum

The industrial/ thematic forum is conference sub brand of WIOTC focusing upon the fields of industry, agriculture, energy, AI, auto Intelligence, transportation, logistics, culture , tourism, healthcare, smart life, finance, etc. The forum can be hosted or co-organized by industrial associations or companies.

*Duration: Between half day and one day*

*Scale: 100 to 200 participants*

*For example, Industrial IoT Forum, AI Forum, etc.*

## Investment Promotion Forum (by local government/ high-tech and industrial parks management agency)

The investment promotion session or roadshow is an event centering on business or investment attraction as well as implementation of projects, which can be organized by local governments, economic development zones, and industrial parks.

*Duration: two to four hours*

*Scale: 200 to 500 participants*

## Supply Chain Matchmaking Meeting

The Matchmaking meeting is a targeted exchange activity for supply chain and industrial chain ecological partners to be expanded by the WIOTC for domestic and foreign enterprises, and will invite domestic and foreign enterprises to participate in one-to-many face-to-face supply and demand docking to promote exchanges and cooperation between enterprises.

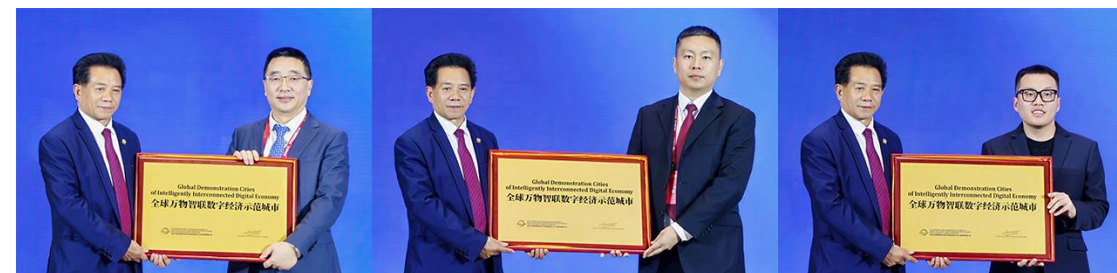

The conference is held at the same time, and the exclusive area is face to face.

# Demonstration enterprises and cities featuring digital economy

In line with Global Digital Cooperation and Sustainable Development Goals, and in order to promote the innovative development of the intelligently interconnected digital economy, guide countries around the world to make a transition towards digital economy and support the building of a community of shared future for mankind, WIOTC will launch efforts to shape a batch of demonstration enterprises and cities capable of developing the intelligently interconnected digital economy, aiming at providing reference for the strategy of IoT development among countries and enterprises, building the intelligently interconnected global market of digital economy, bringing benefits to people and advancing the innovative development of world economy and society.

The application and recommendation for demonstration enterprises and cities will start from January every year.

# World IoT Ranking List Top 500

Since its inception in 2017, the World Internet of Things Ranking List, known as WIOTRL, is committed to encouraging the innovation of IoT enterprises and organizations of all countries in the world, promoting the infrastructural construction of IoT and the development of digital economy, supporting traditional companies in the transformation and updating of IoT, building a new economic market of global IoT, commending new structural models and systems of IoT and new integrated intelligent products and solutions, boosting social progress and development of global new economy, benefiting people in terms of smart and intelligent life, work and production and contributing to the achievement of UN SDGs.

World IoT Ranking List Top 500 accounts for two thirds of output of global digital economy and promotes and encourages the development of IoT industry and IoT-related economy. The ranking has attracted the participation of companies from nearly 100 countries and drawn attention from the international community and thousands of media.

# World IoT Awards

In order to drive the development of IoT and digital economy, promote the progress of world economy and society, help to deliver benefits to people in terms of life and work, and contribute to the achievement of the UN Sustainable Development Goals and the building of a community of shared future for mankind, the World Internet of Things Convention (WIOTC) therefore establishes the World IoT Awards to encourage and commend enterprises, government institutions and organizations from all over the world which have and are making contributions to the innovative development of IoT and digital economy across the globe. The World IoT Awards has been held for five years in a row.

- ◆ **CATEGORY – PERSON:** “WORLD IOT SPECIAL CONTRIBUTION AWARD”, “WORLD IOT PROMOTION AWARD”, “WORLD IOT PERSON OF THE YEAR AWARD”
- ◆ **CATEGORY – ENTERPRISE:** “WORLD IOT LEADING ENTERPRISE OF THE YEAR AWARD”, “WORLD IOT OUTSTANDING ENTERPRISE OF THE YEAR AWARD”, “WORLD IOT EXCELLENT ENTERPRISE OF THE YEAR AWARD”
- ◆ **CATEGORY – PROJECT:** “WORLD IOT INNOVATION PROJECT AWARD”

# Excellent Cases of Intelligently Interconnected Digital Economy

In order to advance the development of the fully and intelligently connected digital economy worldwide, guide the upgrading of the digital economy, and support the United Nations' Sustainable Development Agenda, the WIOTC Organizing Committee is launching a "Call for Outstanding Cases in the Fully and Intelligently Connected Digital Economy." We invite digital economy organizations, institutions, and enterprises from around the world to submit leading, innovative, and exemplary solutions and outstanding cases. These submissions will serve as valuable references for the digital economy development strategies of countries worldwide and highlight the innovative strength of the submitters.

The selected cases will be publicly announced at the WIOTC Annual Conference, and certificates will be awarded to the submitting entities. Additionally, the chosen cases will be recommended to relevant United Nations agencies, international organizations, national government bodies, and research institutions.
